Alfredo Jeong Hyun Park

Software Engineer

+52 55 4768 9736 | parkalfredojeonghyun@gmail.com | Mexico City, MX | linkedin.com/in/alfredo-jeong-hyun-park

PROFESSIONAL OVERVIEW

Senior backend engineer with 3+ years building scalable software for payments and industrial IoT platforms in Go, Java, and TypeScript. Focused on clean code and robust architecture, I transform complex requirements into high-performance, maintainable systems—from distributed services and data models to the infrastructure they run on.

WORK EXPERIENCE

BACKEND ENGINEER | Smart Payment Services, Mexico City JUN 2026 – PRESENT

- Built a Go microservice delivering real-time notifications for the Next360 payments platform at a p99 latency under 85ms.
- Added versioning to the login and users microservices and rolled it out without taking the service down, running the old and new versions side by side so existing clients kept working through the migration.
- Proposed and led the frontend migration from npm to pnpm, hardening the build supply chain and pre-empting the late-2026 npm CLI CVEs and Shai-Hulud package compromises.

SENIOR FULLSTACK ENGINEER | Rubidex, Mexico City MAR 2023 – JUN 2026

- Led the architecture and development of BMS Intel, a large-scale Building Management System with real-time industrial device control.
- Architected core backend systems including work orders, UUID-tracked command execution, a centralized File Service, and a system-wide ID migration across 100+ files.
- Implemented Passkey (WebAuthn) authentication with backup codes, using Redis to store device metadata for each registered passkey.
- Scaled a multi-tenant admin platform and production infrastructure on Docker and CI/CD, supporting multiple products including Gridlock.

SOFTWARE DEVELOPER INTERN | Listo.mx, Mexico City NOV 2021 – MAY 2022

- Built automated data pipelines generating structured PDF reports from financial account statements, with dynamic invoice interfaces in Django.
- Introduced automated tests and streamlined environment setup, improving deployment reliability and developer onboarding.

EDUCATION

B.S. in Computer Science and Technology | Tecnológico de Monterrey, Mexico City Graduated: 2024

SKILLS

Languages	Go, Java, Python, TypeScript, JavaScript, SQL
Frameworks	Spring Boot, Node.js, NestJS, Next.js, React, Django, FastAPI
Infrastructure	AWS, Kubernetes, Docker, PostgreSQL, Redis, RabbitMQ
Practices	CI/CD, Microservices, WebSockets/SSE, Git
